

**February 27, 2019  
Ottawa, Ontario**

**PDAC CONVENTION; BOOTH 3348  
Metro Toronto Convention Centre  
March 3-6, 2019**

Mayo Lake Minerals Inc. cordially extends its invitation to meet with Dr. Vern Rampton, Ph.D., P. Eng., President & CEO, and Tyrell Sutherland, M.Sc., P.Geo., Vice President Exploration, at our booth next week. They will be pleased to update interested parties on the compelling prospects for our planned precious metal drill programs this summer at our highly prospective properties in the Yukon.

Mayo Lake's properties include five claim groups totalling 1,139 claims, covering 231 square kilometres in the prolific Tintina Gold Province. The claims were acquired because of overlooked gold-related geologic data from the 1960s and the presence of prolific placer operations. The properties all lie in the under-explored part of Tombstone Plutonic Belt, with proximity to existing gold mines and promising discoveries. To date, Mayo Lake has made numerous significant findings and delineated multiple targets for this summer's drill program and beyond.

MLM is presently completing a placement for Flow Through and Common Share Subscription Receipts for a minimum of \$1M and a maximum of \$2.1M. The completion of this private placement will result in the funding of MLM's 2019 exploration program.

**About Mayo Lake Minerals Inc.**

MLM is a private company focussed on the rapid development of precious metal projects in the Mayo Lake region of the Yukon. It currently has 52.4 million common shares outstanding.
